Professional Summary

Senior Full-Stack Developer with 2 years of experience designing and building scalable web applications using React, Node.js, MongoDB, and AWS. Proven ability to own end-to-end product features from architecture to deployment, with strong expertise in both frontend and backend development. Track record of delivering production-ready modules with measurable business impact.

Technical Skills

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SurveyJS
Backend: Node.js, Express.js, REST APIs, Authentication & Authorization
Databases: MongoDB, MySQL, DynamoDB
Cloud & DevOps: AWS (S3, EC2, DynamoDB, IAM), Git, GitHub
Programming Languages: JavaScript, Python
Core CS Fundamentals: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks

Professional Experience

Codegnan IT Solutions

Jan 2026 – Present

Senior Developer

Hyderabad, India

- Architected and developed **Form Builder Module** using React, Redux, and SurveyJS, taking full ownership of end-to-end implementation including database design, API integration, and UI development
- Built custom internal form platform replacing Google Forms, enabling secure surveys, feedback collection, and organizational data tracking with role-based access control
- Designed and implemented role-based access interfaces with backend integration, improving permission control and operational efficiency by 40%
- Developed **Attendance Module** with full-stack implementation, improving tracking accuracy and reducing manual effort by 35%
- Created reusable component library and RESTful APIs, reducing development time by 30% across teams
- Collaborated with product and backend teams using agile methodologies and GitHub workflows

MakeSkilled

Oct 2023 – Dec 2025

Senior Developer (Full-Stack)

Remote

- Developed end-to-end features for React-based hackathon platform, including frontend UI, backend APIs, and database integration
- Built scalable backend APIs for LMS using Node.js and Express.js with secure authentication, improving system reliability by 45%
- Designed and deployed cloud infrastructure using AWS services (S3, DynamoDB, EC2), reducing operational costs by 25%
- Delivered multiple full-stack MERN applications with focus on security, scalability, and maintainability
- Optimized database queries and API performance, reducing response time by 40%

Key Projects

Form Builder Module (Full-Stack) | React, Redux, SurveyJS, Node.js, MongoDB

Codegnan LMS

- Built dynamic form creation system with SurveyJS supporting surveys, feedback, and structured data collection with conditional logic
- Implemented backend APIs for form submission, data storage, and analytics with MongoDB aggregation pipelines
- Enabled organization-wide tracking and reporting, improving workflow automation and data-driven insights

Online Hackathon Platform | React, Node.js, Express.js, MongoDB

MakeSkilled

- Developed scalable full-stack platform supporting user registration, team management, project submissions, and event workflows
- Implemented secure authentication, file upload handling with AWS S3, and real-time status updates

LMS Backend Platform | Node.js, Express.js, MongoDB, AWS

MakeSkilled

- Designed RESTful APIs for course management, user authentication, and progress tracking with JWT-based security
- Optimized database operations and implemented caching strategies, improving query performance by 50%

Education

Jawaharlal Nehru Technological University Anantapur (JNTUA)

2019 – 2023

Bachelor of Technology in Computer Science

CGPA: 7.0/10.0
